Summary

I'm a self-taught full stack developer who likes building things end to end, from mobile apps and web frontends to the backend APIs behind them. I also enjoy exploring lower-level programming in Rust and C, and learning how devices work under the hood. I'm a quick learner: I pick up unfamiliar tools and platforms fast and get productive with them right away.

Experience

Join Venture AI July 2025 - Present

Full Stack Developer • React Native, TypeScript, GraphQL, Node.js, Firebase

- Handle app submission and store-specific requirements for the Play Store and App Store: builds, signing, listings, review compliance, and rejection handling.
- Handle iOS- and Android-specific behavior in React Native, including audio sessions, permissions, and native module differences.
- Handle complex web, mobile app, and backend platforms across the full stack.

Projects

EternaLink App Store / Play Store

Voice AI calling app (React Native, GraphQL, ElevenLabs, Firebase)

A mobile app for real phone conversations with an AI voice. My work:

- Built the app frontend in React Native, including auth, notifications, and subscription billing.
- Implemented AI agent calling with ElevenLabs (voice cloning) and handled the audio buffers for real-time playback.
- Built on-device speech-to-text for both iOS and Android.
- Run the AI calling flow from the frontend to cut latency.

TeamPlayer Live Site

Hiring management SaaS (Frontend development)

Frontend for a hiring platform with AI-driven candidate search, a manual application form, lead generation, and meeting scheduling.

LuxuryOps Live Site

Business website (Frontend development)

A website for a chauffeur service in Barbados. Built the admin, customer, and staff dashboards and handled the complex UI design, plus the booking flow tying it together.

Technical Skills

Languages	TypeScript, Rust, Python, C, C++
Frontend	React Native, React, Next.js, Svelte, Tauri
Backend	FastAPI, Actix-web, Express, GraphQL, Socket.io, PostgreSQL, MongoDB
Systems & Tooling	Linux, Neovim, Git, and other CLI/dev tooling

Education

Self-taught. Professional-level, end-to-end product experience through independent study and professional work.

Languages

English, Bangla, Hindi
