

Samiul Basir Fahim

Full Stack & Systems Developer

+8801645186122 | samiulbasirfahim.rxen@gmail.com | Mymensingh Sadar, Bangladesh | github.com/samiulbasirfahim

Summary

Self-taught full stack developer with hands-on experience across mobile, web, and backend development, plus a strong grounding in Linux systems-level programming and tooling. Comfortable owning a product end-to-end – from native mobile clients and web frontends to backend APIs and infrastructure – and equally at home writing low-level Rust and C for systems work.

Experience

Join Venture AI

July 2025 – Present

Full Stack Developer

Remote

- Work across the full stack – mobile (React Native), web frontend, and backend services – delivering features end-to-end.
- Build and maintain voice AI, real-time, and data-driven product features, integrating third-party APIs and native modules as needed.
- Debug cross-platform issues spanning native Android/iOS behavior, React Native internals, and backend service integration.

Freelance Developer

Full Stack & Systems Developer

- Deliver end-to-end mobile, web, and backend solutions for independent clients, alongside systems-level tooling work.

Projects

EternaLink

[GitHub](#)

Voice AI calling app – React Native, GraphQL, ElevenLabs, Firebase

- Real-time voice AI calling app shipped to the iOS App Store.

VocaReception-AI

[GitHub](#)

AI receptionist frontend – React Native

- Frontend for monitoring appointments and activity for an AI receptionist agent.

Construction App Backend

[GitHub](#)

Backend – Bun, Express, Prisma, JWT auth

- Backend for a private construction company's inventory and task management system.

FeetFirstPartner

[GitHub](#)

Shoe shop partner app – React Native

- Frontend for a shoe management shop's partner application.

Technical Skills

Languages	TypeScript, Rust, Python, C, C++ (intermediate)
Frontend	React Native, React, Next.js, Svelte, Tauri
Backend	FastAPI, Actix-web, Express, GraphQL
Systems & Tooling	Linux, Neovim, Git, and other CLI/dev tooling

Education

Self-taught – built professional-level, end-to-end product experience through independent study and freelance client work.

Languages

English, Bangla
